AVAYA | CERTIFIED
Implementation Specialist

PROFESSIONAL SUMMARY:

Results driven Cloud Engineer with 12 years of experience designing, deploying and managing scalable cloud solutions. Expertise in Kubernetes, OpenShift, AWS, Azure, GCP DevOps practices and infrastructure as code tools to optimize performance and reduce costs. Adept at collaborating with cross functional teams to align cloud strategies with business objectives. Passionate about delivering innovative secured and highly available cloud solutions.

CORE COMPETENCIES:

- **Cloud Platforms:** Azure (AKS, AVD, App Services), AWS (EKS, EC2, S3, Lambda, CloudWatch), Openshift
- **Containerization & Orchestration:** Docker, Kubernetes, Red Hat OpenShift, Helm
- **Infrastructure as Code:** Terraform, Ansible, ARM Templates, CloudFormation
- **CI/CD Pipelines:** Jenkins, GitLab CI, Azure DevOps, ArgoCD, Spinnaker
- **Monitoring & Logging:** Prometheus, Grafana, ELK Stack, Datadog, Splunk
- **Version Control:** Git, GitHub, Bitbucket
- **Scripting & Automation:** Python, Bash, PowerShell, Groovy
- **Operating Systems:** Linux (RHEL, Ubuntu), Windows Server
- **Security & Compliance:** RBAC, IAM, Key Vault, AWS KMS, CIS Benchmarks, Network Policies
- **Networking:** VPC, VNets, Load Balancers, VPN, DNS, WAF, CDN

EDUCATION AND CERTIFICATIONS:

- 2007- 2011: **Bachelor of Engineering - Electronics and Communication Engineering** from Annamalai University - India.
- Cisco Certified Network Associate (CCNA) – (Certificate No: 411054169410BPXF)
- Red Hat Certified Engineer - (RHCSA & RHCE) - (Certificate No: 130-054-463)
- Avaya Certified Implementation Specialist (ACIS) - Certified (Avaya CM & CMM)
- ITIL V3 Foundation
- Certified Kubernetes Application Developer (CKAD)
- Databricks Generative AI Fundamentals – (Credential ID: 124540983)
- Datastax Apache Cassandra™ Certified

DevOps:

Hands on Experience with Docker, Kubernetes (K8s) infrastructures and public Google Kubernetes Engine (GKE), AWS EKS (Elastic Kubernetes Service) and Azure Kubernetes Service (AKS) platforms.

- Hands on experience with Microservice application development and microservices distributed systems.
- Hands on Experience with JAVA Enterprise Application development frameworks (Spring MVC, spring boot, JAKARTA EE, Micro profile, Quarkus, JSF and JSP)

PROFESSIONAL EXPERIENCE:

DevOps Engineer, Company Name: Novomind

location: Dubai - (from March 1st 2021 to August 2024)

Responsibilities:

- Installing and configuring NOVOMIND IAGENT and IHELP Chatbot and Call Application for government Clients.
- Designed and implemented scalable, secure CI/CD pipelines using Azure Pipelines, reducing deployment time.
- Implemented OpenShift clusters (v4.x) for production workloads, integrating CI/CD with Jenkins and ArgoCD.
- Automated application deployment pipelines for microservices (Java/Spring Boot, Node.js) reducing deployment.
- Managed and maintained a multi-cluster OpenShift environment, ensuring high availability and performance.
- Orchestrated containerized workloads on Azure Kubernetes Service (AKS), enhancing application scalability and resilience.
- Deployed and managed monitoring and alerting solutions with Azure Monitor and Log Analytics, improving incident response times.
- Designed and implemented network architecture for secure communication between Azure services.
- Built infrastructure modules in Terraform for VPC, EC2, ECS, and RDS to support environments.
- Implemented centralized logging and alerting using ELK stack and AWS CloudWatch metrics.
- Installing and configuring Java EE Application Servers, Webserver and configuring with Databases and IT infrastructure.
- Implemented fully automated EKS-based Java microservice deployments using Terraform, Helm, and Argo CD with blue/green and canary release strategies and auto-rollback.

Technologies:

Java Version: JAVA JDK 11, API: JaxRS REST, SOAP, JTAI, Spring Boot, JSF and JSP servlet, Microservices, Domain Driven Design, Event driven design, Akka, OSGI, Docker, Kubernetes, Jira, Gitlab, Oracle SQL 19c, MSSQL, PostgreSQL, AWS, VMWARE, Azure.

IT Engineer, Company Name: City Services Consultancy

location: Dubai - (from June 6th 2014 to January 2021)

Responsibilities:

- Lead the implementation and configuration of Application server for large scale production environments.
- Migrated on-prem workloads to AWS using CloudFormation, EC2 Auto Scaling, and RDS.
- Automated patching, backup, and user provisioning using Ansible playbooks and Python scripts.
- Collaborated with developers to troubleshoot CI/CD failures and container orchestration issues.

- Deployed autoscaling and caching strategies with ElastiCache Redis to handle large requests per minute.
- Administered and optimized server infrastructure for application deployments including both on-premises and cloud environments.
- Managed cloud environments on AWS and Azure, including EC2, S3, RDS, VMs, and Azure App Services.
- Administered Linux servers and automated daily maintenance tasks using Bash scripts.
- Configured Nginx, Apache, and HAProxy for load balancing and SSL termination.
- Supported application deployment and configuration management using early Ansible playbooks and shell scripts.
- Implemented centralized logging and alerting using ELK stack and CloudWatch metrics.
- Designed and implemented real-time monitoring solutions using tools like Grafana and Nagios.
- Built and maintained CI/CD workflows in Azure DevOps for .NET and Java applications.

Technologies:

Java Version: JAVA JDK 8, API: JaxRS, JTAPl , Modular Enterprise Application Dev Stack With OSGI, Centos, Windows Server, Databases (MSSQL , PostgreSQL), Webserver (IIS, Apache, Nginx), Linux Clustering, Nagios.

IT Engineer, Company Name: Prologix

Location: Dubai - (from December 2013 to June 2014)

Responsibilities:

- Installing and configuring Avaya Media Servers S8300 Series S88XX and G450 and G350 Media Gateways.
- Configuring ISDN trunks, Hunt groups, Extensions/Stations, VDN's, Vectors.
- Administering Cisco call manager for integrating with Avaya and Asterisk.
- Configuring of avaya ip, Digital and analog phones.
- Troubleshooting, Administering and Monitoring of Windows servers..

System Administrator, Company Name: Amtex systems, location: Chennai - (from February 2012 to August 2013)

Responsibilities:

- Monitoring and Administering of Windows Servers with tier 3 data center setup.
- Performing Backup and Troubleshooting, Administering and Monitoring of Red hat Linux servers.
- Administering and troubleshooting Cisco routers, Switches and juniper Firewall.
- Fully Responsible for RHEL server, FTP server, Apache Web server, iptables.
- Administering and troubleshooting of Linux-based Avaya virtual Media Servers – S8300, G450 Media Gateway.
- Integrating Avaya call manager into cisco call manager.
- Administering of Active Directory, DHCP, DNS and Group Policy services on Windows server.
- Developed Python and Bash scripts for environment health checks, backup automation, and custom deployment hooks.

System Engineer, Company Name: PCS Technologies

Location: Chennai, India – (from May 2011 to February 2012)

Responsibilities:

- Installing and configuring of Ubuntu, CentOS Linux, Windows Servers.
- Troubleshooting of system hardware related issues.
- Troubleshooting of Laptop hardware and software related issues.
- Installing and configuring of Analog phones and analog loggers.
- Configuring E-mail Accounts in MS Outlook using Microsoft Exchange Server.
- Managing & Maintaining User Accounts in Active Directory.
