SUMMARY

Java Full Stack Developer with 8+ years of experience in designing, developing, and scaling enterprise-grade web applications using Java, Spring Boot, ReactJS, and modern web technologies. Strong expertise across backend services, REST APIs, front-end development, and end-to-end SDLC ownership. Proven experience leading teams, optimizing system performance, and delivering high-quality, scalable solutions used by millions of users. Accessibility and inclusive design experience adds depth to building robust, user-centric applications.

EXPERIENCE

Engineering Team Lead – Inclusive Product Development

Tata Consultancy Services

June 2023 – Present, Hyderabad, India

- Led design, development, and release planning of full-stack features, supporting multiple production releases per quarter.
- Spearheaded **architecture enhancements of core backend modules**, improving system latency by **25%** and increasing platform stability and scalability.
- Directed the release planning and deployment coordination for further WCAG implementation in the product, supporting multiple production releases per quarter with minimal post-release issues, directly impacting the user experience for students with blindness, low vision, and hearing impairments.
- Mentored and guided 8 junior engineers, supporting on-boarding, code reviews, and technical upskilling to ensure high-quality delivery of accessible content. Reduced accessibility-related defects in production by 30% through rigorous QA steps.
- Improved release quality by strengthening pre-release validation, resulting in a reduction in post-release defects by ~30%.

Senior Product Engineer (Accessibility & Inclusive Design)

Tata Consultancy Services

August 2021 – June 2023, Hyderabad, Telangana

- Re-architected legacy frontend components using **modern JavaScript and ReactJS**, improving maintainability and user experience.
- Single-handedly drove the accessibility modernization of a legacy web-application by re-architecting the front-end structure, enabling sustainable support for assistive technologies and inclusive user interactions.
- Worked closely with QA and DevOps teams to support continuous integration, deployment, and production stability.
- Directed cross-functional delivery outcomes for the accessibility project over 18 months, achieving a 97% on-time launch rate while maintaining WCAG 2.1 compliance.
- Managed accessibility review process for 12+ major releases over 18 months, utilizing Axe and Wave tools to identify and remedy an average of 35 accessibility issues per deployment, resulting in a 60% reduction in post-release defects and directly supporting ongoing WCAG 2.1 compliance initiatives.

Software Development Engineer

Tata Consultancy Services

April 2017 – August 2021, Hyderabad, Telangana

- Functioned as a key contributor to TCS iON – A transformational cloud-based “phygital” platform that digitizes learning, assessments, exam administration, skilling, and institutional operations for educational institutions, boards, and enterprises.
- Led end-to-end delivery of features across the SDLC, from requirement analysis to deployment and post-release monitoring.
- Owned development and production support for critical modules of TCS iON, supporting large-scale users across reputed Indian and International Institutions.

EDUCATION

Bachelor's in Technology (Electronics and Communication Engineering)

Vardhaman College of Engineering • Kacharam, Telangana • 2016

SKILLS

Technical: HTML5 | CSS3 | JavaScript | ReactJS | SpringBoot | Java

Accessibility – related : WCAG 2.1 Standards | Inclusive Design | User-Centric Design Thinking | ARIA Roles | Assistive Technology

Interpersonal : Technical Consulting | Change Management | SDLC Governance | Team Management | Data-Informed Decision Making | Product Development
